Aasish Chunduri

+1(980)-382-0028 | aasish.chunduri2@gmail.com | GitHub | LinkedIn

A passionate problem-solver and full-stack developer, dedicated to crafting elegant and efficient software solutions that transform ideas into reality.

TECHNICAL SKILLS

Languages:	Java, JavaScript, Python, Typescript, C, HTML5, CSS3, SQL.
Frontend:	React, Angular, React Hooks, Redux, D3.js, jQuery, Bootstrap, Tailwind CSS, Figma, UX Design.
Backend:	Spring Boot, Hibernate, NodeJS, ExpressJS, Flask, Django.
Databases:	PostgreSQL, MySQL, MongoDB.
Data Analysis:	Tableau, Amazon QuickSight.
Others:	AWS, Docker, Git, Jira, VS Code, IntelliJ IDEA, MS Office.

WORK EXPERIENCE

Graduate Research Assistant - University of North Carolina at Charlotte **Aug 2023 – Dec 2023**

➢ ***Toyota Racing Development (TRD)***

- Spearheaded the development of a **React.js**-based time series application, focusing on enhancing user experience and interface responsiveness.
- Successfully transitioned the application's database from **MongoDB** to **PostgreSQL**, optimizing for integration and performance in the APEX environment.
- Developed two additional REST API endpoints using **Node.js** and **Express.js**, broadening data access capabilities and improving application functionality.
- Refined Python scripts for better data filtering, preprocessing, and parsing, aligning with specific user needs and constraints.
- Implemented Knex.js for efficient database schema migrations and deployed the application using Docker, ensuring portability and scalability in the new environment.

Software Engineer – Full Stack Developer **Sept 2020 – Jul 2022**

➢ ***Tata Consultancy Services***

- Improved the banking app's user interface using **React.js**, employing Redux for state management and lazy loading techniques to enhance application performance and responsiveness.
- Developed and integrated RESTful APIs using **Spring Boot**, streamlining transaction processing and data communication.
- Utilized Spring Boot for efficient database connectivity and operations, significantly boosting data retrieval and transaction handling.
- Implemented and configured OAuth2 and JWT security protocols within the Spring Boot framework, enhancing application security and data protection.
- Played a key role in developing microservices using Spring Boot, contributing to scalable architecture, and maintaining 99.95% application uptime.

ACADEMIC PROJECTS

- **Job Recruitment Portal:** Developed a **MERN** stack job portal simplifying postings and applications for recruiters and candidates, containerized with **Docker**, and deployed on AWS EC2.
- **E-Wallet Microservice Application:** Designed and developed a scalable e-wallet platform using **Java** and **Spring Boot**, with microservices for User Profiles, Financial Transactions, Wallet Balances, and Real-Time Notifications, adhering to RESTful standards. Implemented **Apache Kafka** for efficient message queuing, integrated Redis caching for accelerated transactional data access, and fortified application security with Spring Security and OAuth2 frameworks.

CERTIFICATIONS & PUBLICATIONS

- AWS Certified Developer Associate. (Link)
- "Autonomous obstacle avoidance robot using regression," presented at the ICCIDE 2020 Springer Conference.(Link)
- "Forecasting the number of infections of novel coronavirus with deep learning," published in the International Journal of Computer Applications (IJCA). (Link)

EDUCATION

University of North Carolina at Charlotte Charlotte, NC

Master of Science in Computer Science **GPA: 4/4** Aug 2022 - Dec 2023

VR Siddhartha Engineering College Vijayawada, India

Bachelor of Technology in Computer Science and Engineering **GPA: 3.9/4** Aug 2016 - Sept 2020
